

**There's a lifetime of  
grace and flavour  
in an Aga Cooker**

The advantages of cooking with an Aga solid fuel Cooker are so numerous, so overwhelming, that we can only hint at them here. Aga treats food *tenderly*, cooks gently and evenly, preserving the full flavour and natural juices. (Succulent joints and baking in a class by itself). And, of course, an Aga Cooker heats your water too. Now there's a new Aga in the family . . . the brilliant automated *oil-fired* Aga (illustrated here). All the famed Aga benefits plus the effortless efficiency of automated oil-firing. Allied Ironfounders (who make Aga Cookers & Boilers) aim to make life easier and more luxurious for people. They ensure the reliability of all their products for the home and for industry. This singles out everything they make . . . VOGUE Baths for instance, LEISURE Cookers, Room Heaters, Sinks and Kitchens and RAYBURN Room Heaters. ALLIED Radiators too. So why not single some out for yourself?
