AGA Mini & AGA Compact

AGA Compact 110 with 60cm Extension Module in Linen

TIMELESS • TACTILE • SIMPLE • DISCREET

WHY CHOOSE AGA?

At AGA we take honest, hardworking materials and engineer them into relevant products that look great and perform brilliantly. In a world built for obsolescence, AGA is a constant. Built for life and built to last.

Put simply, everything we do is designed to make things easier, more efficient and better all round.

We know how much traffic a kitchen sees, how many meals a cooker cooks and how someone is always in the way just when you've got to the tricky bit. We understand that form follows function, so solve problems through the use of hardworking materials to create products that work hard and are a joy to use.

For almost a century the AGA has been at the heart of the home and every cast-iron AGA is still built in Shropshire.

AGA products are thoughtfully created, making the most from the least and using nothing unnecessarily. It is our intention to ensure everything we produce is responsibly made, intuitive to use and works as hard as you do. We aspire to create and curate beautiful, tactile, products that delight and inspire.

EVERY COOK & EVERY KITCHEN

There is an AGA cooker for every cook and every kitchen. You don't need a huge house – the smallest AGA is just 60cm wide – and you don't need a vast energy budget because you can run an AGA cooker for less than the cost of a couple of weekly ready meals. If you like induction cooking that's great because many of our cookers feature state-of-the-art induction hobs.

If you've ever owned an AGA, we don't need to tell you how food tastes better. We don't need to explain the unique warmth of an AGA kitchen. We don't need to tell you how tactile an AGA cooker is. These are all things you tell us.

AGA cookers have changed hugely over the last few years and the electric AGA Compact models offer the most innovative AGA cooking yet.

INTRODUCTION TO AGA COMPACT AND AGA MINI

AGA COMPACT

AGA Compact cookers offer all the cooking features you could want. This was the first AGA collection to feature models that combine both cast-iron radiant heat cooking and conventional cooking, so they take flexibility to a whole new level. The mix of ovens, hotplates and an induction hob, means you have a cooker for all seasons and one that makes it very easy to manage energy usage. Hotplates have fast heat up times so that they can be switched on and off as required reducing energy usage.

The AGA Compact is ideal for modern well insulated homes where the heat into the kitchen is not essential or where your family may be out all day.

AGA MINI

The AGA Mini Cast Iron cooker brings the enduring qualities of AGA cast-iron cooking into a smaller space without losing the warmth and capability that define an AGA.

The cooker has two cast-iron, heat-storage ovens. The top one is for roasting or baking, while the bottom simmering oven offers a gentler heat that allows for slower cooking. On top, you can choose a traditional AGA hotplate or a gas hob.

Control is intuitive. With independently operated ovens and hotplate, the AGA Mini offers flexibility for everyday cooking.

WHAT'S ON TOP

HIGHLY EFFICIENT HOTPLATES

The round hotplate is an iconic feature that has been present on the AGA cooker since its invention and its steady heat ensures perfect results every time.

Each AGA Compact and AGA Mini Cast Iron model has a highly efficient hotplate, which heats up in just 10-12 minutes. It has two settings: simmering mode or boiling mode.

The 60cm Extension Module provides an additional simmering plate when added to the 90cm, 100cm and 110cm models.

The AGA Compact has a two-zone or three-zone induction hob with bridging feature for use with a griddle or fish kettle. This addition means these really are the most flexible AGA cookers ever made.

INDUCTION COOKING

SAFE, FAST AND ENERGY EFFICIENT

Induction is the safest, fastest, most controllable and energy efficient way to cook. Once the pan makes contact with the hob surface, the pan becomes the heat source so food is heated directly. Induction hobs are easy to clean and maintain with easy-wipe surfaces to remove any spills with the minimum amount of fuss, quick to heat up and cook, have a safe to touch surface and are contemporary and stylish.

AGA Compact 110 with three-zone induction hob plus a 60 cm Extension Module

Large two-zone* induction hob with bridging feature, suitable for two pans or ideal for use with a griddle plate, fish kettle or other large cookware * three-zones on the 110cm models.

AGA bridging zone feature

Power Boost function provides maximum power instantly, ideal for bringing a large pan of water to the boil quickly.

Pan detection ensures the hob will recognise when a pan is placed on any of the cooking zones and will switch off automatically once the pan is removed.

Boil dry detection feature and the child lock, ensure safety and peace of mind.

Pause button is handy when you need to stop cooking for a short while, for example to answer the door.

Low temperature settings can be used to keep food warm, defrost or melt chocolate.

- 1 (44°C) – Defrosting, melting butter or chocolate
- 2 (70°C) – Keep warm, once you've prepared food
- 3 (94°C) – The perfect simmer

Large 90L fan oven on the AGA Compact 60cm Extension Module

AGA COMPACT OVENS

INDEPENDENTLY CONTROLLABLE OFFERING FLEXIBILITY AND ENERGY EFFICIENCY

All AGA Compact models have two cast-iron heat storage ovens – one that can be used for roasting or baking, the other for simmering. They cook using gentle radiant heat emitted from the cast iron, ensuring food tastes amazing and all the flavour and goodness is locked in.

The 90-litre conventional fan oven, on the AGA Compact 60cm Module, is perfect for those times when you need extra cooking capacity or want to cook a quick weekday meal. For event cooking, you have the best of all worlds and can make use of every oven.

AGA Compact cookers also have an independently heated warming oven, with the 90cm model having a tall warming oven complete with a plate rack. Great attention has been paid to even the smallest of details, such as the stylish and branded handrail, magnetic door closures on the large fan oven and tall warming oven, and contemporary rotary controls, ensuring cookers in the collection are built for life and built to last.

AGA castings provide the very best
heat retention, the highest quality and
unequalled radiant heat cooking

THE BENEFITS OF CAST IRON

AGA FOOD TASTES BETTER

AGA food tastes better simply because an AGA cooks better, using gentle radiant heat to retain the food's moisture, flavour, texture and goodness. The heat steadily radiates simultaneously from the inner surfaces of the ovens, creating dedicated cooking zones at pre-set temperatures for ease, convenience and stress-free use.

The iron for AGA cooker parts is cast in foundries using state of the art moulding techniques. Latest technologies ensure that AGA grey iron castings provide the very best heat retention, highest quality and unequalled radiant heat cooking. To manufacture the highest quality cast-iron for AGA, molten iron is still smelted at close to 1500 degrees centigrade, the liquid metal is then poured into moulds to produce the AGAs distinctive iconic appearance.

It's this process that ensures longevity and ovens that make cooking intuitive and which produce the very best results. A large proportion of every cast-iron AGA is made from recycled iron products that have been melted down and, in turn every AGA is almost completely recyclable.

THE BEAUTY OF VITREOUS ENAMEL

While most cookers are spray painted in minutes, the AGA cookers multiple protective coats of vitreous enamel take three days and at least three firings to complete. It is this painstaking enamelling process that helps ensure the working life of an AGA cooker is measured not in years, but in decades.

AGA cast-iron cookers are available in 18 gorgeous vitreous enamel colours. Bespoke colour service also available.
