

# RAYBURN FIRES

**NEW** Electric Built-In Fires

Home heating from Rayburn

# Introducing our NEW Rayburn built-in electric fire collection

There are few things as relaxing and evocative as watching a real fire flicker away. That mix of cosy warmth and beautiful flames guarantees to make even the chilliest day snug and comfortable.

The new collection of Rayburn Stratus™ electric fires has been designed to emulate the restful appeal of a real fire. Offering the ultimate flame picture combined with controllable heat, a Rayburn electric fire gives both the look and cosiness you'd expect and with ease and efficiency.

Rayburn fires are manufactured to the highest possible quality and have vibrant, variable multi-coloured flame pictures, which allow you to set the style and mood, meaning you have a truly unique fire.

With total remote control as standard, every one of these models offers ease of use, style, flexibility and realistic flame patterns and they come with the added advantage of full thermostatic control. This allows you to set the temperature in the room either via the remote control unit or with the thermostat.

Rayburn fires offer the best of all worlds: controllable heat when required, realistic adjustable flame patterns for a fantastic focal point in the room and ease of installation – all you need is a 13-amp supply. And with a variety of styles and sizes to choose from, you can be sure to find a model ideally suited for any room.

## Choosing your electric fire from Rayburn

There's an option perfect for your home, whether you're looking for a super-slim model or a more substantial looking fire and whether it's for a traditional or contemporary setting. The extra slim, slim and extra tall models come with a stylish black frame designed to make the fire a stunning focal point in any room. Use of the frame is optional, so you can also choose to create a look all of your own.

### RAYBURN STRATUS™ EXTRA SLIM RANGE

This beautifully designed built-in fire is available in three sizes, offering the ultimate choice in slimline fires with a reduced depth. This means the freedom to install in any room in your home because – as with the all Rayburn fires – no is flue required.

### RAYBURN STRATUS™ SLIM RANGE

Two sizes are available in this collection, both offering a sleek, stylish look. With a deeper fire bed than the Extra Slim range these fires offer a greater depth to the flame picture.

### RAYBURN STRATUS™ EXTRA TALL

Models in this range offer increased height and surface area to create a real style statement. Using the latest technology to create a beautiful and realistic effect, loose dancing flames are visible across the entire height of the unit, enhancing the aesthetic appeal.

## RAYBURN STRATUS™ TRU VIEW

Tru View models offer ultimate flexibility.

The design allows the fire to be viewed from three sides, creating a striking flame picture. This model can be set in a corner location and viewed as a two-sided appliance, or even as a single-sided design. It comes in a variety of lengths for ease of installation and to ensure there's a model perfect for your home.

## MEDIA INCLUDED

All Rayburn fires are supplied with a combination of amber glass and vermiculite to create a glowing fire bed. The Stratus™ XT and Tru View series also include an 11-piece log set.

Each model comes with a remote control that allows full control of the flame picture and the heat output and there's even an option to programme the on and off functions.

All Rayburn electric built-in fires are easy to install – all they require is a 13-amp supply.

Each model comes with a remote control that allows you to control the flame picture, the heat output and even programme your fire to on and off functions.

All of our electric built in fires are easy to install with just a 13-amp supply.

## STRATUS™ EXTRA SLIM RANGE

This beautifully designed range of built-in fires is available in three sizes. With no flue required, you can install models in this range anywhere you choose. Each one comes with a remote control, allowing you to adjust your flame effect brightness from the comfort of your sofa. The flame picture is outstanding, giving the effect of a real flame and creating a calm and cosy space.

There is also the option to choose a no-heat setting with a variable flame effect to give a beautiful, relaxing glow in the room. The colour LED light strips allow for multi-coloured flame options. With just the click of the remote control, you can mix red, yellow and blue elements to create a pattern unique to you. Extra Slim models come with everything you need to create a warm and evocative atmosphere.

### DIMENSIONS

MODEL	WIDTH	HEIGHT	DEPTH	WEIGHT	HEAT OUTPUT
Stratus™ 75-30 XS	741mm	504mm	130mm	23kg	1.9kW
Stratus™ 100-30 XS	995mm	504mm	130mm	23kg	1.9kW
Stratus™ 125-30 XS	1249mm	504mm	130mm	34kg	1.9kW

## STRATUS™ SLIM RANGE

The Slim range is available in two popular widths – 100cm and 125cm – and offers a deeper media bed than Extra Slim models, giving you an increased depth to the appearance of the fire. This provides enhanced visual performance, which increases the stunning effect of the fire.

You have the option to control the blending of the flame colours red, yellow and blue and, with the down lighter

control, you can also adjust the top down colours and intensity reflected in the media bed. With a useful 1.9kw of heat output, these fires are the perfect addition to any room. Featuring a full remote control and thermostatic temperature adjustment, they are also easy to install.

### DIMENSIONS

MODEL	WIDTH	HEIGHT	DEPTH	WEIGHT	HEAT OUTPUT
Stratus™ 100-30 S	995mm	600mm	192mm	40kg	1.9kW
Stratus™ 125-30 S	1249mm	600mm	192mm	48kg	1.9kW

## STRATUS™ EXTRA TALL RANGE

With widths of 100cm and 125cm, fires in the Extra Tall range offer so much more when it comes appearance and visual effect. They have an increased height to the fire aperture, meaning you can enjoy the realistic effect of taller flames dancing above the media bed. LED lighting technology ensures a vibrant realism to the beautiful flame pictures.

These models also feature an 11-piece log set which is set out on the media bed for added realism. The logs work perfectly with the down lighter feature, which highlights the logs with vibrant colour and shade. Extensive colour variation, full remote control functionality and thermostatic temperature control ensure these fires help create a stylish and unique look in your home.

### DIMENSIONS

MODEL	WIDTH	HEIGHT	DEPTH	WEIGHT	HEAT OUTPUT
Stratus™ 100-44 XT	995mm	750mm	322mm	53kg	1.9kW
Stratus™ 125-44 XT	1249mm	750mm	322mm	50kg	1.9kW

## STRATUS™ TRU VIEW RANGE

The flexible design of fires in the Tru View range means they can be installed to offer a three-sided, two-sided or single-faced flame picture, depending on room size and appliance setting.

With a three-sided unit, you can enjoy the stunning flame picture from the sides as well as the front, making this ideal for larger rooms and as the focal point in a living area. The two-sided model can easily be installed into a corner space.

Plus, with all the features of the Extra Tall range – including depth of media bed, log effect features, variable flame picture, remote control operation of fire and heat with thermostatic controls – these are visually striking fires that add an additional dimension to your room.

### DIMENSIONS

MODEL	WIDTH	HEIGHT	DEPTH	WEIGHT	HEAT OUTPUT
Stratus™ 100-39 TRU	1098mm	677mm	363mm	44.5kg	1.9kW
Stratus™ 125-39 TRU	1352mm	677mm	363mm	50kg	1.9kW
